Attention: Ms. Rosemary Busterna

Subject: Year 2003 Registration  
Glacier Northwest, Inc. Seattle Cement Terminal  
Facility ID #11872

Dear Ms. Busterna:

This letter is provided as a follow-up to our telephone conversations of last week regarding the registration fee for the Glacier Northwest, Inc. Seattle Cement Terminal, Facility ID #11872. As I indicated in those conversations, the Seattle Cement Terminal is not correctly classified under North American Industrial Classification System (NAICS) 32731, Cement Manufacturing, as the facility is not engaged in the manufacture of cement. The most appropriate classification for the site is Standard Industrial Classification (SIC) 5032—Brick, Stone, and Related Construction Materials, and NAICS 42132—Brick, Stone, and Related Construction Material Wholesalers. According to the Office of Management and Budget, SIC 5032 applies to the following:

done 12/11/02  
R6B

“Establishments primarily engaged in the wholesale distribution of stone, cement, lime, construction sand, and gravel; brick (except refractory); asphalt and concrete mixtures; and concrete, stone, and structural clay products (other than refractories).”<sup>1</sup>

This definition describes activities at the Seattle Cement Terminal.

As we also discussed, the concrete batch plant which was formerly operating at the adjacent site and was also registered under Facility ID #11872 was removed from the site in May, and the batch plant site was reclassified as inactive under the Department of Ecology Sand and Gravel General Permit as of July 1.

We appreciate your assistance in updating our site registration to reflect the above. Please feel free to call me at (206) 768-7612 if you should have any questions or require further information.

Sincerely,

Thomas G. Hanson, P.E.  
Environmental Manager, Washington Division
